			24	\$9,575	\$13,409

All prices are in USD

2. General Licensing Terms

1) **License & Support Type:** All purchased packages can be either Perpetual or Non-Perpetual.

License Perpetuality	Development Rights	Deployment Rights	Software updates	Subscription Renewal rate
Perpetual	Forever	Forever	Until end of subscription	50%
Non-perpetual	Until the end of subscription	To be removed after end of subscription, including end-users	Until end of subscription	100%

All packages include Standard Technical Support. Enterprise packages include Premium Technical Support

Standard technical support	Premium technical support
Included in Bronze, Silver, Gold and Platinum licenses.	Included in Enterprise license or available as an upgrade.
Technical onboarding via detailed documentation, tutorials, and community resources	Technical onboarding via detailed documentation, tutorials, and community resources
Email-based support includes 10 support tickets per year for general questions, usage issues, and bugs reported via email or user portal	Priority email support with unlimited support tickets per year for general questions, usage issues, and bugs reported via email or user portal
Additional support tickets available for purchase*	Assistance with code excerpts and debugging for LightningChart .NET API usage
	Two 30-min support sessions a year via live video call (English only) for advanced technical advice
	Preferential hourly rates for Proof-of-Concept or custom development projects

2) Additional Support Tickets: extra technical support can be purchased via ticket bundles:

- 3 tickets at 350 USD
- 5 tickets at 500 USD

3) Term in Months: for **Perpetual licenses**, it indicates the validity time of your subscription during which you will receive software updates.

For **Non-Perpetual** licenses, it indicates the validity time of your subscription and the validity time of development and deployment rights which will end when a subscription expires. You can extend these services by purchasing a subscription renewal.

Note: *Renewal rates are applied based on the license perpetuality type of the license to renew.*

4) Renewals: rates are applied based on the perpetuality type of the license to renew

- A 50% subscription renewal rate applies for all Perpetual licenses.
- A 100% subscription renewal rate applies for Non-Perpetual licenses.

Note: *Renewal rates apply to currently effective prices.*

5) Offline (manual) activation: service activation fee of \$300 USD applied to an expired subscription.

3. LightningChart .NET Packages for Enterprises

Enterprise packages are comprehensive and custom licensing solutions. Enterprise packages feature:

	Technical onboarding via detailed documentation, tutorials, and community resources		Priority email support with unlimited support tickets per year, for general questions, usage issues, and bug reports reported via email or user portal
	Assistance with API code excerpts for LightningChart .NET API usage and debugging		Two 30-minute tech support video call a year, in English, for advanced technical advice
	Preferential hourly rates for Proof-of-Concept or custom development projects		

Enterprise packages are tailored solutions and each case is revisited individually. **Enterprise packages** may be purchased for a **Single Platform** or **All Platforms** in **Bronze, Silver, Gold, or Platinum** levels.

Additionally, Enterprise packages may be purchased as a Non-Perpetual or Perpetual license.

Enterprise packages feature the following components: **XY, 3D, Polar, Smith, Maps, Signal Tools,** and **Volume Rendering.** Additionally, only Enterprise licenses at Gold and Platinum levels, are entitled to purchase, at an extra cost, the **Instant Source Code Access** and the **Source Code Assurance.**

For more information about Enterprise packages, contact us at sales@LightningChart.com.

4. Source Code

Available only at Enterprise level

Only Enterprise licenses at Gold and Platinum levels are entitled to buy, at an extra cost, the **Instant Source Code Access**. In case of purchasing the Source Code, it is to be obtained for each purchased license. Benefits of the Source Code subscription:

- ✔ Full C# source code of the libraries. No inaccessible C++ parts.
- ✔ Modify the library and build a custom version.
- ✔ Optimize performance of your application when running without code obfuscation.
- ✔ See clearly where CPU and GPU power are spent.
- ✔ Instant access to source code, no need for escrow service
- ✔ Over 1 million of rows of code, including around 5000 properties and public methods.
- ✔ Full source code debugging and availability to get support with code changes

Note: *LightningChart Enterprise Gold & Platinum Source Codes also include the Instant Source Code Access or LightningChart Gauges.*

5. LightningChart Gauges Controls

Gauges Controls can be obtained for FREE but the Source Code is sold separately when not having a *LightningChart .NET Enterprise Gold or Platinum + Source Code* license.

Product	Term in Months	WPF & Silverlight	Source Code
Gauges Controls	N/A	0	\$500

All prices are in USD

5. Other Licensing Terms

6) Team Discounts: We offer progressive discounts for teams of 4 and more developers. Please contact us directly at sales@LightningChart.com for more information.

7) Upgrades: Upgrading the subscription costs the price difference between higher tier and the subscription you currently have. For more information please contact us at sales@LightningChart.com.

8) Floating License: the structure of the floating license is almost identical to LightningChart .NET packages. It can be installed and used by several developers on multiple machines. One developer can use a floating license at a time.

This license costs approximately 2.5x the price of a single developer license price. Floating licenses need internet connection to the LightningChart licensing server. If you're interested in acquiring a Floating License, please check availability of a customer-side floating license service at sales@LightningChart.com.
